## PROFILE

As a resourceful full-stack developer specializing in JavaScript and TypeScript, I enjoy both independent work and collaborative environments where knowledge sharing is encouraged. My passion lies in building creative solutions through code, and I'm eager to join a team of equally enthusiastic developers to further hone my skills and contribute to innovative projects.

## WORK EXPERIENCE

- Frölunda Pingst** APR 2024 - PRESENT  
Software Developer Freelancer  
We are a team of two developers and a UX designer working on a dynamic website for an event. My responsibility is to work on the architecture and core functionality of the page. See [GitHub](#) and [website](#).
- Media Works** Feb 2023 - May 2023  
Software Developer Intern  
I was part of building a highly technical headless CMS system as a Progressive Web App, utilizing Typescript, React, HTML, and CSS. I also got to learn the basics of the RDF database system. We were a small team of developers and I had a good mentor guiding me.
- Melongatan 3** Sep 2020 - Present  
Teaching Assistant  
We are working in close teams where communication and good team dynamics are essential and crucial. This experience is honing my communication skills, adaptability, and flexibility.
- GBA Ships** Aug 2018 - Jun 2020  
Marine Operations and Project Leader  
The ship is a non-profit organization that sails from port to port, sharing knowledge, help, and hope. Initially served in the deck department and later as a project leader, organizing and leading the ship's visit to Jamaica.
